1. Click on the “Start” menu in the lower-left corner of your screen and type in “Windows Update” in the “Search Programs and files” section. Click on the “Windows Update” icon that appears when the search is complete.

2. On the “Windows Update” window that opens. Click on the “Check for updates” option on the left hand side of the screen to have Windows see if there are any new available updates.
3. Once Windows has finished searching, you will be given the option to install any needed updates. Click on the “Install updates” button, and accept any license agreements if prompted.

**NOTE:** You may be asked to restart after the update has installed.
