

Acknowledgement of Furman's Expectations for OLLI Members

By September 13, all members of Furman University's Osher Lifelong Learning Institute (OLLI) who will participate in OLLI courses or enter any Furman facilities must submit **EITHER** a copy of their completed COVID-19 vaccination card **OR** sign this acknowledgement of Furman's expectations for unvaccinated participants.

1. Unvaccinated OLLI members who are symptomatic/test positive for COVID-19, or who are a close contact (> 15 minutes exposure at a distance of < 6 feet) of an individual who is symptomatic or positive for COVID-19, will be required to report exposures or symptoms to the OLLI Office and subsequently quarantine or isolate per CDC recommendations (*see below).
2. Unvaccinated OLLI members will be responsible for covering costs of testing associated with COVID-19, if, for example, surveillance monitoring were to become necessary due to a COVID-19 outbreak within the OLLI community.

By entering my name, I acknowledge that I have read and understand Furman's expectations for unvaccinated OLLI members as outlined above.

* CDC for **quarantine**: Participants who meet the criteria for a close contact exposure and who remain symptom free are required to quarantine for a minimum of 7 days from the time of most recent exposure, if they are able to produce a negative COVID test sampled between day 5 and 7 post-exposure. If no such test is produced, the minimum quarantine period will be 10 days.

The CDC recommendation for **isolation**: Participants in isolation are required to have no contact with other individuals for a period of 10 days from the time of symptom onset or the positive test was acquired, assuming the individual has no fever (< 100.4°F) without taking fever-reducing medications for a minimum of the most recent 24-hour period, and with improving symptoms.
