Randolph E. Hutchison

Department of Health Sciences
Furman University
Physical Activities Center, HSC Office Suite L
Greenville, SC 29613
Office: (864) 294-3687
Fax: (864) 294-2942
E-mail: randolph.hutchison@furman.edu

Citizenship: US

EDUCATION

University: Clemson Univ.–Bioengineering/Engineer. & Sci. Education, Clemson, SC
Dates: June 2008-August 2011
Field of Study: Biomechanics/Engineering & Science Education Research
Degree: Ph.D. Bioengineering, November 2011.
Research Advisor: Lisa Benson, Ph.D.
Research Topic: Assessment of Knowledge Transfer in the Context of Biomechanics

University: Clemson University–Bioengineering, Clemson, SC
Dates: June 2008-March 2011
Field of Study: Biomechanics
Degree: M.S–Bioengineering, March 2011.
Research Advisors: Lisa Benson, Ph.D.
Research Topic: Quantifying Antalgic Knee Function with a Wireless Gait Analysis System Using Inertial Measurement Units

University: Virginia Tech University–Aerospace & Ocean Engineering, Blacksburg, VA
Dates: August 1994-May 1999.
Field of Study: Aerospace Engineering
Degree: B.S.

PROFESSIONAL EXPERIENCE

Assistant Professor, Department of Health Sciences, Furman University, Greenville, SCAugust 2011–present

Adjunct Professor (Advising), Department of Bioengineering, Clemson University, Greenville, SC, August 2012–present.

Graduate Research Assistant, Department of Bioengineering/Department of Engineering & Science Education Research, Clemson University, June 2008–July 2011.

Physics & Pre-Engineering Teacher, Science Department, Greer High School, Greer, SC, August 2002–May 2008.

Aerospace Engineer, Structural Designer 2nd/3rd Stage Turbine F-35, Pratt & Whitney Aircraft Engines, West Palm Beach, FL/New Haven, CT, August 1999–June 2002.

Honors and Awards

1. Best Graduate Posters (4th & 5th Place), American Control Conference, Boston, MA. (July 2016)
2. Selected as Omicron Delta Kappa Honor Society Mentor, Tripp Hurt, (April 2015)
3. Selected for *NSF South Carolina EPSCoR/IDeA, Science: Becoming the Messenger* workshop, Madren Center, Clemson, SC. (January 2013)
4. Public Service and Agriculture Next Generation Graduate Fellowship (PSA-NGGF), Clemson University, Clemson, SC. $15,000/yr for 3 years. (August 2008-June 2011)
5. National Board Certification in Physics, Greer High School, Greer, SC. (June 2007)
6. Selected to teach International Baccalaureate two-year physics program. Greer High School, Greer, SC. (June 2006)
7. Teacher of the Year, Greer High School, Greer High School, Greer, SC. (June 2005-August 2006)
8. Awarded Program Administrator Project Lead the Way: 4-year Pre-engineering, Greer High School, Greer, SC. (June 2005)
9. Pratt & Whitney Aircraft Engines, "Eagle Award" ($1,000 Cash Award) for Exemplary Performance, West Palm Beach, FL/Hartford, CT. (August 2000)

Grants

1. **Furman Research Proposal Grant,** "Wireless Near Infrared Spectroscopy (NIRS) for Modeling and Sensing Human Fatigue and Recovery with Applications in Real-Time Health Monitoring," Furman University, Greenville, SC
   R.E. Hutchison (Principal Investigator)
   $2,000
   November 2016-May 2019 **(Submitted September 2016)**

2. **Brooks Institute at Clemson University.** "Human Energy Expenditure and Recovery Modeling," Furman University, Greenville, SC
   G. Mocko and A. Vahidi (Co-Principal Investigators)
   R.E. Hutchison (Co-Investigator)
   $15,000
   May 2016 – May 2019 **(Submitted August 2016)**

3. **NSF Cyber-Physical Systems 15-541, Proposal ID-1544650,** "Cyber-Enabled Monitoring of Fatigue Dynamics During Physical Activity with Applications to Fitness and Health," Furman University, Greenville, SC
   A. Vahidi, G. Mocko, and R.E. Hutchison (Co-Principal Investigators)
   $628,608
   December 2015 - May 2019 **(Not-Funded, requested revise/resubmit)**

4. **Furman Research Proposal Grant,** "Wireless Electromyography (EMG) for Modeling and Sensing Human Fatigue and Recovery with Applications in Real-Time Health Monitoring," Furman University, Greenville, SC
   R.E. Hutchison (Principal Investigator)
   $2,000
   November 2016-May 2019 **(Funded)**

5. **NIH INBRE Faculty & Student Fellowships, "**Modeling and Sensing Human Fatigue and Recovery with Applications in Real-Time Health Monitoring," Furman University, Greenville, SC
   R.E. Hutchison (Principal Investigator)
   $17,500
   May 2015 – May 2016 **(Funded)**

6. **NSF/NIH Smart & Connected Health 13-543, Proposal ID-1502207,** "Modeling and Sensing Human Fatigue and Recovery with Applications in Real-Time Health Monitoring," Furman University, Greenville, SC
   A. Vahidi, G. Mocko, and R.E. Hutchison (Co-Principal Investigators)
   $500,000
   May 2015 - May 2019 **(Not-Funded, requested revise/resubmit)**

7. **DARPA Warrior Web, BAA-13-43,** "SPARC: Soldier Performance Augmented Response Clothing," Clemson University, Clemson, SC
   C. Cole (Principal Investigator)
   R.E. Hutchison (Subcontract Principal Investigator)
   $92,744
   April 2014 – September 2014 **(Not Funded)**

8. **American Colleges of the South (ACS),** "A Faculty Learning Community on Blended Learning: Developing and Implementing Best Practices at Furman University," Furman University, Greenville, SC
   D. Haney (Principal Investigator)
   R.E. Hutchison (Co-Investigator)
   $4000
   January 2013 – May 2014 **(Funded)**

9. **Spencer Dissertation Fellowship for Research Related to Education,** "Assessment of Knowledge Transfer in the Context of Biomechanics," Clemson University, Clemson, SC
   R.E. Hutchison (Principal Investigator)

$25,000
June 2011-June 2012 **(Not Funded)**

10. **Public Service and Agriculture Next Generation Graduate Fellowship (PSA-NGGF)**, "PAccMAn: Portable Accelerometer Motion Analysis System," Clemson University, Clemson, SC.
$15,000/yr for 3 years
August 2008-June 2011 **(Funded)**

11. **NSF- Center for Advanced Engineering Fibers and Films**, "Engineering Fibers and Films Experience (EFF-X)," Clemson University, Clemson, SC
$500
June –August 2007 **(Funded)**

12. **Project Lead The Way,** "Science, Technology, Engineering, & Math (STEM) Education Using Robotics," Greer High School, Greer, SC
R.E. Hutchison (Principal Investigator)
$25,000
September 2006-June 2008 **(Funded)**

Invited Presentations

TEACHING EXPERIENCE

Furman University, Greenville, SC

Instructor of Record

HSC323 – Kinesiology (Spring 2012-Present)
FYW1264 – First Year Writing Seminar - "Can Humans Fly?" (Fall 2016-Present)
FYS1214 – First Year Seminar - "Can Humans Fly?" (Fall 2014)
HSC101 – Wellness Concepts (Fall 2011-Present)
HSC451–Biomechanics (In catalog, future course offering)
BIO260 – Introduction to Biomaterials (In catalog, future MayX offering)

Clemson University, Clemson, SC

Instructor of Record

BIOE461 - Movement Science in Biomechanics (Summer 2009, Summer 2010)

Guest Lecturer

ESED8880 – Preparing for the Professoriate (Fall 2013-Fall 2015)
ESEC8000 – Seminar in Engineering and Science Education (March 2012)
BIOE320 – Biomechanics (Fall 2010)

Greer High School, Greer, SC

Teacher

Project Lead the Way – Computer Integrated Manufacturing (2007-2008)
International Baccalaureate Physics (2006-2008)
Project Lead the Way – Principles of Engineering (2006-2008)
Project Lead the Way – Introduction to Engineering Design (2005-2008)
Physical Science (2002-2008)

New/Major Revision Course Development

HSC/BIO/PHYS/MTH – Biophysics: Experimental Tools and Techniques, Furman University (Future development in 2017): This course would cover both the experimental tools and techniques to detect biological processes as well as the fundamental mathematics and physics underlying the use of these tools. From X-Ray to MRI, physics has provided a basis to further explore what it means to be human and this course will focus on how we can address health issues medically using these techniques and tools.

BIO260 – Introduction to Biomaterials, Furman University (Summer 2016-Summer 2017): Previously created by Victoria Turgeon, PhD and Cassandra Wright, PhD (Post-Doc), I have discussed working with Dr. Turgeon to teach the course with possible revamps from my bioengineering background. Current curriculum includes: An exploration of ideas in cardiovascular, orthopedic, and regenerative medicine and how today's

technologies and medical innovations have changed these medicines. Course activities will involve trips to local research and medical facilities & hands-on manipulations of biomaterials and devices.

FYS1214 to FYW1264 Conversion - First Year Writing Seminar, "Can Humans Fly?" Furman University (Summer 2016): FYS1214 was converted to a First Year Writing Seminar (FYW). Significant revisions to course content including direct writing and research instruction. Selected as a FYW Fellows to share content and ideas on the FYW program, including a workshop in July 2016.

HSC251: Movement Analysis of Sports Performance, Furman University (Summer 2014): From research in biomechanics and teaching kinesiology, students expressed interest in further pursuing careers in 3D/2D movement analysis (exercise science/biomechanics, coaching, teaching, motion labs, physical therapy, occupational therapy). From ACSM conferences, found textbooks and relevant technology and incorporated in this course proposal. Course will focus on the study and analysis of human movement patterns in sport and sport injury. Both qualitative and quantitative methods covered in an applied approach by utilizing 3-D and 2-D motion analysis hardware and software in the human performance laboratory as well as in the field. Focus will be on performance improvement and reducing the risk of injury.

HSC323 – Kinesiology, Furman University (Summer 2013): Course had been primarily biomechanics based and was adjusted with major revisions to the overall focus, syllabus, textbooks, and lab activities. Based on interviews with alumni in the allied health fields of physical Therapy and occupational therapy, as well as orthopaedic medical practice, redesigned course based on clinical case studies moving through each major joint of the body. Added multimedia resources to the online class management system as well as lectures to assist with visualization. To synergize material in the health sciences curriculum, structured course decisions were made in partnership with other courses in the department such as Medical Aspects of Athletic Training, Motor Learning, and Anatomy and Physiology.

Clustering FYS1214: Can Humans Fly? & FYW1234: Birds and Society, Furman University (Summer 2015): Partnered with John Quinn, PhD (ornithologist in biology) to cluster FYS concerning birds in society with FYS1214 concentrations of history, biomechanics and consequences of human flight. Development included regular meetings aligning guest lectures, common readings and assignments such as testing bird wings from the biology department in the custom built wind tunnel from FYS1214. Organization includes common field trip experiences such as bird observations during migration at Caesar's Head state park and a trip to the Smithsonian Natural History Museum and Air and Space Museum in Washington D.C.

BIOE320 – Biomechanics, Clemson University (Fall 2010): Development of teaching modules centered on clinically relevant problem-based learning. Use of teaching interviews and

reflective discussion groups to explore knowledge transfer inside and outside of classroom

BIOE461 - Movement Science in Biomechanics, International Study in Bioengineering, Brussels, Belgium, Clemson Thomas Greene Campus (Summer 2009, Summer 2010): Designed a movement analysis course for the mostly sophomore level participants. This course was student centered and active inquiry, based on student experimental design to learn overarching biomechanics concepts.

Project Lead the Way (PLTW) – Greer High School (Summer 2005 - Spring 2008): Initiated and developed a four-year PLTW pre-engineering program from the initial connection with feed-in middle schools to internships with industry partnerships. Attended 3 years of training and developed syllabi, lessons, labs, activities, assessments and overall course structure for 3 of the 4 courses including: Introduction to Engineering Design (IED), Principles of Engineering (POE), and Computer and Integrated Manufacturing (CIM).

International Baccalaureate (IB) Physics – Greer High School (Summer 2006-Spring 2008): Part of the High School IB diploma program inaugurated in 2006. Included preparing students for both the AP and IB Physics exams for college credit. Designed entire course including laboratories, lectures, problem sets, and demonstrations.

UNIVERSITY AND PUBLIC SERVICE

Assistant Lab Director – Molnar Human Performance Laboratory Innovations:

1. Lifting Machine for resistance training evaluation and assessment
2. Upgraded Wireless Electromyography
3. Two metabolic ventilatory systems
4. Upgraded cycling ergometry with torque-velocity capability
5. Wireless/non-invasive Near-Infrared Spectroscopy (NIRS)
6. Implemented real-time 3D motion capture/analysis
7. Created laboratory "WIKI" for improvement of undergraduate student-led research
